EGYPT TO BUY KAZAKH WHEAT, GROW GRAIN IN UGANDA

"Separately, Egyptian media said that Uganda had allocated about 2 million acres (800,000 hectares) of land to Egypt to cultivate wheat and corn.

"Uganda allocated to us 2 million feddans (acres) of land in a number of places," Agriculture Minister Amin Abaza told al-Ahram, without specifying the value of the deal.

"The Egyptian side, represented by Egyptian private agricultural companies, will conduct tests on it shortly to determine the most appropriate strains for it," he added.

Abaza said Egypt was also looking into the best way to finance the project and for transport options, and that seven agriculture firms were prepared to start work immediately.

He added that a delegation of government officials and businessmen would travel to Uganda in October to negotiate final details and prepare to start work on the first 200,000 acres."
