Window cleaner

Mix 2cups vinegar with 2cups water and you have a window cleaner

Home made scouring powder.

1cup of baking soda

1cup of salt

1cup of borax

Mix the ingredients and then store in a closed container,

use it as you would any powdered cleaner.

This heavy-duty cleanser will get the greasiest grime off pots and pans ,appliances, tile floors ,bathroom fixtures and just about every other surface inside -and outside your home.
