## WOW VIVA AFRICAN

Posted by Astartois - 2008/07/03 10:31

---

An American, a Japanese, and a Ugandan were sitting naked in the sauna.

Suddenly there is a beeping sound. The American presses his forearm and the beeping stops. The others look at him questioningly. "That's my pager," he says.

"I have a microchip under the skin of my arm."

A few minutes later a phone rings. The Japanese lifts his palm to his ear. When he finishes he explains, "That's my mobile phone. I have a microchip in my hand."

The Ugandan feeling decidedly low-tech but not to be outdone, decided he had to do something just as impressive. He steps out of the sauna and goes to the toilet. He returns with a piece of toilet paper hanging from his butt. The others raised their eyebrows and said, "Wow! What's that?" "I'm receiving a Fax," he explains

:woohoo: :silly: :lol: :laugh:

After digging to a depth of 100 metres last year, Russian scientists found traces of copper wire dating back 1000 years, and came to the conclusion that their ancestors already had a telephone network one thousand years ago.

So, not to be outdone, in the weeks that followed, American scientists dug 200 metres and headlines in the US papers read:

"US scientists have found traces of 2000 year old optical fibres, and have concluded that their ancestors already had advanced high-tech digital telephone 1000 years earlier than the Russians."

One week later, the Ugandan newspapers reported the following:

"After digging as deep as 500 metres, Ugandan scientists have found absolutely nothing. They have concluded that 5000 years ago, their ancestors were already using wireless technology.
